

Good Afternoon Kimberly,

After reviewing the inspection report and checking over the roof no hail damage was found. The marks found are just normal wear and tear on the roof that it will see over the years as well as the possibility of being debris from the trees that hang over the roof. Roof life in general looks fairly good overall and probably has anywhere from 2-4 years depending on weather over the course of those years.

The issues that would need to be addressed would be the box vents and stack flashing that were pointed out in the report. The charge for that work would be \$150 to reseal those roof vents. Feel free to give me a call if you decide to use us for the work on the flashings and if you have any other questions and concerns.
