## FULL REPORT

Note: There is a button (above) for summary section

Homewrx Inspections, LLC is pleased to present your Home Inspection Report! We like to keep things clear and concise...and get right to the important stuff that you want! But first...the following paragraphs are required by the state of WI. Enjoy :)

For the purposes of the report, "defect," as defined in section 440.97 (2m), Wis. Stats., means a condition of any component of an improvement that a home inspector determines, on the basis of the home inspector's judgment on the day of an inspection, would significantly impair the health or safety of occupants of a property or that, if not repaired, removed, or replaced, would significantly shorten or adversely affect the expected normal life of the component of the improvement. The contract of sale may define "defect" to also include a condition that would have a significant adverse effect on the value of the property, but such a condition may not be labeled a defect in the report unless it meets the definition in section 440.97 (2m), Wis. Stats.

2. For the purposes of the report, "defect," as defined in section 440.97 (2m), Wis. Stats., means a condition of any component of an improvement that a home inspector determines, on the basis of the home inspector's judgment on the day of an inspection, would significantly impair the health or safety of occupants of a property or that, if not repaired, removed, or replaced, would significantly shorten or adversely affect the expected normal life of the component of the improvement. The contract of sale may define "defect" to also include a condition that would have a significant adverse effect on the value of the property, but such a condition may not be labeled a defect in the report unless it meets the definition in section 440.97 (2m), Wis. Stats.

- 1. "Further Evaluation" - item(s) could turn into a "defect" depending on the findings of the qualified contractor doing the further evaluation.**
- 2. "Repair" - item(s) should ideally be repaired, but do not appear significant enough at time of inspection to be considered a "defect"**
- 3. "Maintenance" - item(s) should undergo normal maintenance to ensure safe and proper functionality so that they do not become a "defect".**
- 4. "Monitor" - item(s) do not appear to meet the definition of "defect" at time of inspection but could turn into a "defect" in the future. Components and mechanicals that are still functioning but are nearing/beyond normal life expectancy are included in this category as a reminder to budget for whenever the need arises.**

2.3.1 CrawlSpace - Support Structure: Best practice is to install a vapor barrier over the dirt floor in the crawlspace. However, no additional concerns were observed in the crawlspace due to the lack of a vapor barrier. Columns, Girder Beam, Floor joists (building components in the crawlspace) appear satisfactory at time of inspection.
